SKILLS

- Technical support
- Network support
- Network monitoring
- Virus protection
- Virus monitoring
- Malware removal
- Malware analysis
- Threat detection
- Threat analysis
- Phishing awareness
- Phishing detection
- Intrusion detection
- Incident response
- Vulnerability assessment
- Vulnerability analysis
- Penetration testing
- Ethical hacking
- Cryptography
- Encryption techniques
- Log analysis
- SIEM management
- SIEM tools
- Wireshark usage
- Nmap scanning
- PowerShell scripting
- Bash scripting
- Cyber threat analysis
- Systems analysis
- Attention to detail
- Problem solving
- Analytical thinking
- Decision-making
- Effective communication
- Teamwork
- Social engineering
- Data encryption
- Security monitoring
- System Installation
- Hardware Installation
- Hardware configuration
- Hardware diagnostics
- Hardware troubleshooting
- Device repair
- Software installation

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Analyst specializing in SOC monitoring, threat intelligence analysis, and penetration testing. Delivered effective incident response through log analysis and alert management from SIEM tools while utilizing offensive security tools for comprehensive assessments. Detail-oriented Systems Technician with expertise in hardware troubleshooting and software configuration, contributing to efficient resolution of technical issues.

EXPERIENCE

December 2023 - Present

Systems Technician

247 Travels And Vacation, Lagos, Nigeria

- Troubleshoot hardware and software issues for various systems, enhancing system reliability.
- Supported installation and configuration of computer systems and peripherals.
- Provided technical support to users, resolving issues quickly to minimize downtime.
- Installed, configured and maintained new computer systems for end users.
- Resolved hardware related issues including replacing parts such as hard drives and RAM modules.
- Conducted regular maintenance activities like patching, updating antivirus programs.
- Identified and recommended improvements to existing systems architecture, optimizing performance.
- Provided support to end users in resolving technical problems remotely or on site.

November 2023 - September 2024

Computer Technician

SLOT Systems, Ikeja, Lagos

- Installed and configured hardware components such as motherboards, processors, RAMs, hard drives, optical drives and other peripherals.
- Troubleshoot computer systems to diagnose hardware and software issues.
- Installed necessary drivers for peripheral devices such as printers, scanners and web cameras.
- Assisted with installing, maintaining and troubleshooting various technologies and applications.
- Assisted in the installation of new operating systems for users.
- Implemented virus protection measures to secure systems from malicious attacks.
- Replicated data stored in old systems onto new ones during upgrades.

EDUCATION

October 2015

Bachelor of Science in Microbiology

AE-FUNAI, Ebonyi State

CERTIFICATIONS

Cisco Cybersecurity certificate
